SUBJECT INDEX

Amorphous carbon foils
Symmetric transmission ($e, \alpha e$) spectroscopy of amorphous carbon foils c5
Angular resolved XPS
Depth profiling of elements in surface layers of solids based on angular resolved X-ray photoelectron spectroscopy 1
APESE
A study of the characteristics of elastic and inelastic reflection of electrons from a copper surface and their utilization for determining the electron spectrometer intensity-energy response function 29
APISE
A study of the characteristics of elastic and inelastic reflection of electrons from a copper surface and their utilization for determining the electron spectrometer intensity-energy response function 29
Auger spectroscopy
Influence of relaxation on the shape of the Auger spectra of metals 39

Binomial smoothing
Binomial smoothing for electron spectroscopies c1

Calibration
Calibration of VG ESCALAB MkII spectrometer for XPS quantitative analysis 141
Catalysts
Quantitative analysis of X-ray photoelectron spectroscopy intensities for dealuminated zeolites and supported catalysts where the promoter-forming elements also occur in the support 99
Copper
A study of the characteristics of the elastic and inelastic reflection of electrons from a copper surface and their utilization for determining the electron spectrometer intensity-energy response function 29
Copper(II) complexes
X-ray photoelectron spectroscopy insight into the coordination modes of cyanate in copper(II) complexes 213
Core ionization energy
A thermochemical study of relations between proton affinities and core electron binding energies 129
Cu(100) surfaces
XPS studies of NaCl deposited on Cu(100) and Ni/Cu(100) surfaces 237
Cyanate
X-ray photoelectron spectroscopy insight into the coordination modes of cyanate in copper(II) complexes 213
Cyano organic compounds
Core levels photoemission and theoretical studies of cyano organic compounds 251

Dealuminated zeolites
Quantitative analysis of X-ray photoelectron spectroscopy intensities for dealuminated zeolites and supported catalysts where the promoter-forming elements also occur in the support 99
Depth profiling
Depth profiling of elements in surface layers of solids based on angular resolved X-ray photoelectron spectroscopy 1
Dimethyl ether
The valence electronic structure of dimethyl ether – complete valence shell binding energy spectra and momentum distributions 153
Diphosphazane ligands
Electronic structures of RN $(PX_2)_2$ ($R=CH_3$ or C_6H_5; $X=Cl$, OCH_3 or OC_6H_5) ligands: an ultraviolet photoelectron spectroscopic study 119
DV-Xα calculation
DV-Xα calculation on XPS for SF_6 valence levels 265

Electron affinity
Inverse photoemission and measurements of electron affinity of solids 115
Electron energy-loss spectra
Electron energy-loss spectra of methanol and assignments of its triplet states 185
Electron momentum spectroscopy
Electron momentum spectroscopy of molecular core states 271
Investigation of the complete valence shell of formic acid by electron momentum spec-

troscopy and Green's function methods 51
Electronic surface states
Surface photovoltage spectroscopy investigations of the electronic surface states on clean and oxygen-exposed polar GaAs(100) and GaAs(111) surfaces 19

Formic acid
Investigation of the complete valence shell of formic acid by electron momentum spectroscopy and Green's function methods 51

GaAs
Surface photovoltage spectroscopy investigations of the electronic surface states on clean and oxygen-exposed polar GaAs(100) and GaAs(111) surfaces 19
Green's function
Investigation of the complete valence shell of formic acid by electron momentum spectroscopy and Green's function methods 51

Inverse photoemission
Inverse photoemission and measurements of electron affinity of solids 115
Iron
On the underlayer and overlayer adsorption of nitrogen on low-index iron surfaces 107

Metal oxides
Correlation between the isoelectric point of solid surfaces of metal oxides and X-ray photoelectron spectroscopy chemical shifts
Metals
Influence of relaxation on the shape of the Auger spectra of metals 39
Methanol
Electron energy-loss spectra of methanol and assignments of its triplet states 185

NaCl
XPS studies of NaCl deposited on Cu(100) and Ni/Cu(100) surfaces 237
Ni/Cu(100) surfaces
XPS studies of NaCl deposited on Cu(100) and Ni/Cu(100) surfaces 237
Ni2*p* photoemission
Final states after Ni2*p* photoemission in the nickel–oxygen system 201
Nickel–oxygen system
Final states after Ni2*p* photoemission in the nickel–oxygen system 201
Nitrogen
Resonance in the electron impact excitation intensities of the inner-shell states of N_2 193
Nitrogen adsorption
On the underlayer and overlayer adsorption of nitrogen on low-index iron surfaces 107

IIB oxides
Some new observations of interband transitions in IIB oxides and sulphides 225

Proton affinities
A thermochemical study of relations between proton affinities and core electron binding energies 129

Relaxation
Influence of relaxation on the shape of the Auger spectra of metals 39
Resonance
Resonance in the electron impact excitation intensities of the inner-shell states of N_2 193

Semiconductors
X-ray photoelectron spectroscopic studies of the semimagnetic semiconductor system $Pb_{1-x}Mn_xTe$ 87
Semimagnets
X-ray photoelectron spectroscopic studies of the semimagnetic semiconductor system $Pb_{1-x}Mn_xTe$ 87
SF_6 valence levels
DV-Xα calculation on XPS for SF_6 valence levels 265
Spiropyran
X-ray photoelectron spectroscopy of spiropyran molecules 79
IIB sulphides
Some new observations of interband transitions in IIB oxides and sulphides 225
Surface photovoltage spectroscopy
Surface photovoltage spectroscopy investigations of the electronic surface states on

clean and oxygen-exposed polar GaAs(100) and GaAs(111) surfaces 19

Symmetric transmission ($e, \alpha e$) spectroscopy
Symmetric transmission ($e, \alpha e$) spectroscopy of amorphous carbon foils c5

UV photoelectron spectroscopy
Electronic structures of RN $(PX_2)_2$ ($R=CH_3$ or C_6H_5; $X=Cl$, OCH_3 or OC_6H_5) ligands: an ultraviolet photoelectron spectroscopic study 119

X-ray photoelectron spectroscopy
Calibration of VG ESCALAB MkII spectrometer for XPS quantitative analysis 141
Quantitative analysis of X-ray photoelectron spectroscopy intensities for dealuminated zeolites and supported catalysts where the promoter-forming elements also occur in the support 99
X-ray photoelectron spectroscopy of spiropyran molecules 79
X-ray photoelectron spectroscopic studies of the semimagnetic semiconductor system $Pb_{1-x}Mn_xTe$ 87
Correlation between the isoelectric point of solid surfaces of metal oxides and X-ray photoelectron spectroscopy chemical shifts c11

XANES
Ru L-edge X-ray absorption near edge structures (XANES) from Ru $LM_{4,5}M_{4,5}$ and $M_{4,5}N_{4,5}N_{4,5}$ Auger yields 177
